

**THE DATA RECORDING MODULE
AND VEHICLE HEALTH REPORTS
ARE JUST TWO MORE EXAMPLES
OF THE ADVANCED TECHNOLOGY
IN GMC'S 2008 LINE-UP
OF W-SERIES TRUCKS.**

**2008 GMC W-SERIES
VEHICLE HEALTH REPORT**

**FEATURES THAT HELP REDUCE
OPERATING COSTS, IMPROVE
PERFORMANCE, MANAGE
RISK AND PROTECT YOUR
TRUCK INVESTMENT.**

THANKS TO THE EXCLUSIVE DATA RECORDING MODULE FEATURE, YOUR DEALER CAN PROVIDE A COMPUTER HEALTH REPORT ON YOUR GMC W-SERIES TRUCK'S CONDITION, USAGE AND DRIVING PATTERNS.

Overall Truck Health Summary

2008 GMC W-Series and T-Series trucks incorporate a powerful vehicle management tool as a standard feature.

It's a Data Recording Module (DRM) that monitors your truck's performance in several vital areas. It enables Isuzu Certified Service Center technicians to quickly produce unique Vehicle Health Reports that show the current status of:

- Engine Condition
- Emissions System Condition
- Brake Usage History
- Fuel Economy with History
- Driver Operating Habits

Vehicle Health Reports provide clear indications of potential problems and list important details of major component's current operating status.

The reports permit accurate service diagnosis, identify component failure/wear history and maximize vehicle up-time. In addition, the reports help establish precise maintenance programs, reduce operating costs and increase long-term residual values.

Protect your truck investment. Ask your GMC truck dealer to monitor the performance of your W-Series and T-Series trucks with Vehicle Health Reports. After all, maintaining healthy trucks is a great way to improve the health of your business.
